

Mark Andrew Miller

Toronto, Ontario • 548-994-3933 • andrewmiller_0@outlook.com • [://Personal_Github](#) • [Linkedin](#)

One time hackathon winner, software engineer in full-stack development. Currently enrolled at Centennial College, and my goal is to be a backend engineer with a strong interest in quant and finances!

PROFESSIONAL EXPERIENCE

S&P Data Digital — Toronto, Ontario

Outbound Sales / Technical Support | February 2023 – September 2024

- Customer Support for Shaw and Rogers
- Supported customers with home internet inquiries and technical concerns, explaining service options clearly.
 - Worked toward sales targets and used Salesforce, Cisco, and Fusion tools to support daily customer interactions.
 - De-escalated frustrated customers through active listening and clear communication.

EDUCATION

Centennial College, Toronto, Ontario

Advanced Diploma of Software Engineering Technology

- Award obtained from web application class for [Marketplace_Project](#)
- Completed 3 Semesters

PROJECTS

PC Parts Price Comparison Tool — Browser Extension | Python

- Developed a browser extension that compares PC component prices to help users plan custom builds based on their selected graphics card and budget.
- Built a Python backend to support component price comparisons and budget-based build recommendations.
- Deployed the backend to Render and published the extension on Firefox Add-ons.

GitHub: [Repository URL]

SketchMotion — Hackathon Project | Next.js, React, TypeScript, Gemini API

- Collaborated on an AI-assisted animation prototype for turning hand-drawn keyframes into animated clips and multi-scene stories.
- The application combines interactive drawing canvas, editable storyboards, and shared keyframes to maintain continuity between scenes.
- Uses Next.js API routes for Gemini-powered visual feedback and video-generation requests, with localStorage and IndexedDB for saving drawings and video assets.
